

nPOD Acceptance Criteria

March 01, 2019

Here at nPOD we are very grateful for our OPO partners and the time, effort you put forth to help us on our quest to find a cure for type 1 diabetes.

Please refer when you have donors that meet the following criteria:

- Type 1 diabetes: Pancreas for donors 40 years or less in age with a type 1 disease duration of 10 years or less.
- Pancreas from any donor 30 years in age or less, with a BMI of less than 30 where the cause of death was related to Diabetic ketoacidosis (DKA).
- Transplant: Pancreas (native and transplanted) from donors any age with a history of type 1 diabetes who has received a pancreas, islet or pancreas/kidney transplant.
- Pancreas from autoantibody positive donors 30 years in age or less, with at least 1 or more autoantibodies, (for those OPOs that screen with nPOD).
- Pancreas from donors 26 weeks gestation to 10 years in age, all donors.
- Pancreas, bilateral lungs and intestinal tract from donors 26 weeks gestation to 10 years in age, all donors.
- Pancreas from donors with a diagnosis of cystic fibrosis, any age.

Inclusion/Exclusion Criteria for nPOD Donors
